

# Diagnostic Wearables: **THE FUTURE OF MEDICAL MONITORING**

What did 600+ design engineers in wearable diagnostic development qualify as their key challenges, tradeoffs and predictions for the field?

**61%**  
see medical device companies focusing more on home-based care products

Over **60%**  
name ease of use and user interface as a top concern

Approximately **40%**  
identify the need for both compact sensors and connectors to solve miniaturization challenges

Roughly **50%** of those surveyed say tech companies and medical device startups will be the leading innovators

**63%**  
agree collaboration across groups is critical for innovation
